Re: Application for Water Supply Bank Lease (29-2395)
Application for Water Supply Bank Rental (County Line Farms) x2

Dear Reviewing Agent:

Please find attached an application offering the entirety of existing water right 29-2395 for lease to the Idaho Water Supply Bank. As shown in the attached CRP documents, the land to which the water right is appurtenant was placed into CRP at the end of 1997 under a 10 year contract which was subsequently extended through 2010.

I have also included two separate applications prepared on behalf of County Line Farms to rent portions of the water right for as long as 5 years. Rental application #1 seeks to rent a 40 acre portion of 29-2395 from an existing well within TWP. 6S, RNG. 29E, Section 11. Rental application #2 seeks to rent a 64 acre portion of 29-2395 for use from an existing well within TWP. 6S, RNG. 29E, Section 15. Included with the applications are the analysis details and results of the transient ESPA model analysis demonstrating that all additional impacts remain below 2 acre-ft per trimester for both proposed rentals.

If you have any questions regarding the applications or need any additional information to allow processing, please don't hesitate to contact me.

Thanks,

Jason C. Helms, P.E.
