Subject: RE: The Conservation Fund, Water Rights Nos. 35-141-75, 35-14177 and 35-14170, Change of Ownership and Change of Point of Diversion application sent 2/20/13

Hi Allan,

I'm the Water Rights Agent processing the transfer application for the rights numbers listed in the subject line. In looking over the paperwork, it appears that the intent of the application is to change the diversion point, but question five on page one ("describe all points of diversion...after the proposed change") is answered as if applying to add a diversion point.

If the purpose of the transfer is to change the point of diversion, a simple amendment will be necessary: We need you to state in writing that the first two points listed in the answer to question five, the current points of diversion, were inadvertently added to the application and should be ignored/deleted because those points of diversion will no longer be used. It'd be preferred that you fax a hand-written and signed document stating your intent to 208-525-7177.

Feel free to give me a call with any questions, 208-525-7161.

Thanks for your assistance with this matter.
