Keith,

If you're sure that Mr. Wood has not been changing the system and enlarging his use in recent years, send me a supplemental field report revising your POU recommendation for 31-7576. I don't think Permit 31-7576 has enough acres to cover 3 more pivot corners, but perhaps it can cover 2 more. Mr. Wood may need to file two transfer applications for Right 31-7560B. One should move a pivot corner from the middle of Section 30 down to the SESW of 30. The second should split off a pivot corner in the middle of Section 30 and change its POD to the well in the SESW of 30.

I think we should be concerned about enlargement, so let's be sure the timing of these changes works out.

I'll put the file on call-up for 30 days.

Thanks.

Shelley

Subject: Dee Lynn Wood POU 31-7567/7560A & 31-7560B

Shelley,

I have a shape for the place of use for 31-7567. If you would like I can re-enter the field exam report and attach the shape to the water right. I am recommending the change based on information in the exam file what I remember & believe Mr. Wood told me during the exam.

Also I am attaching a map of the place of use of 31-7560A, 31-7560B & 31-7567 using ArcView shapes. The Proof report for right 31-7560B lists 6 ac in the SENE Sec 30, T6N, R34E, but the shape file in ArcView shows the use in the SWNE Sec 30, T6N, R34E, with 31-7560A irrigating the SENE Sec 30, T6N, R34E. Also 31-7567 irrigates the four corners in the center of Sec 30. This causes an overlap of 31-7560B & 31-7567 in the SWNE & NWSE Sec 30.

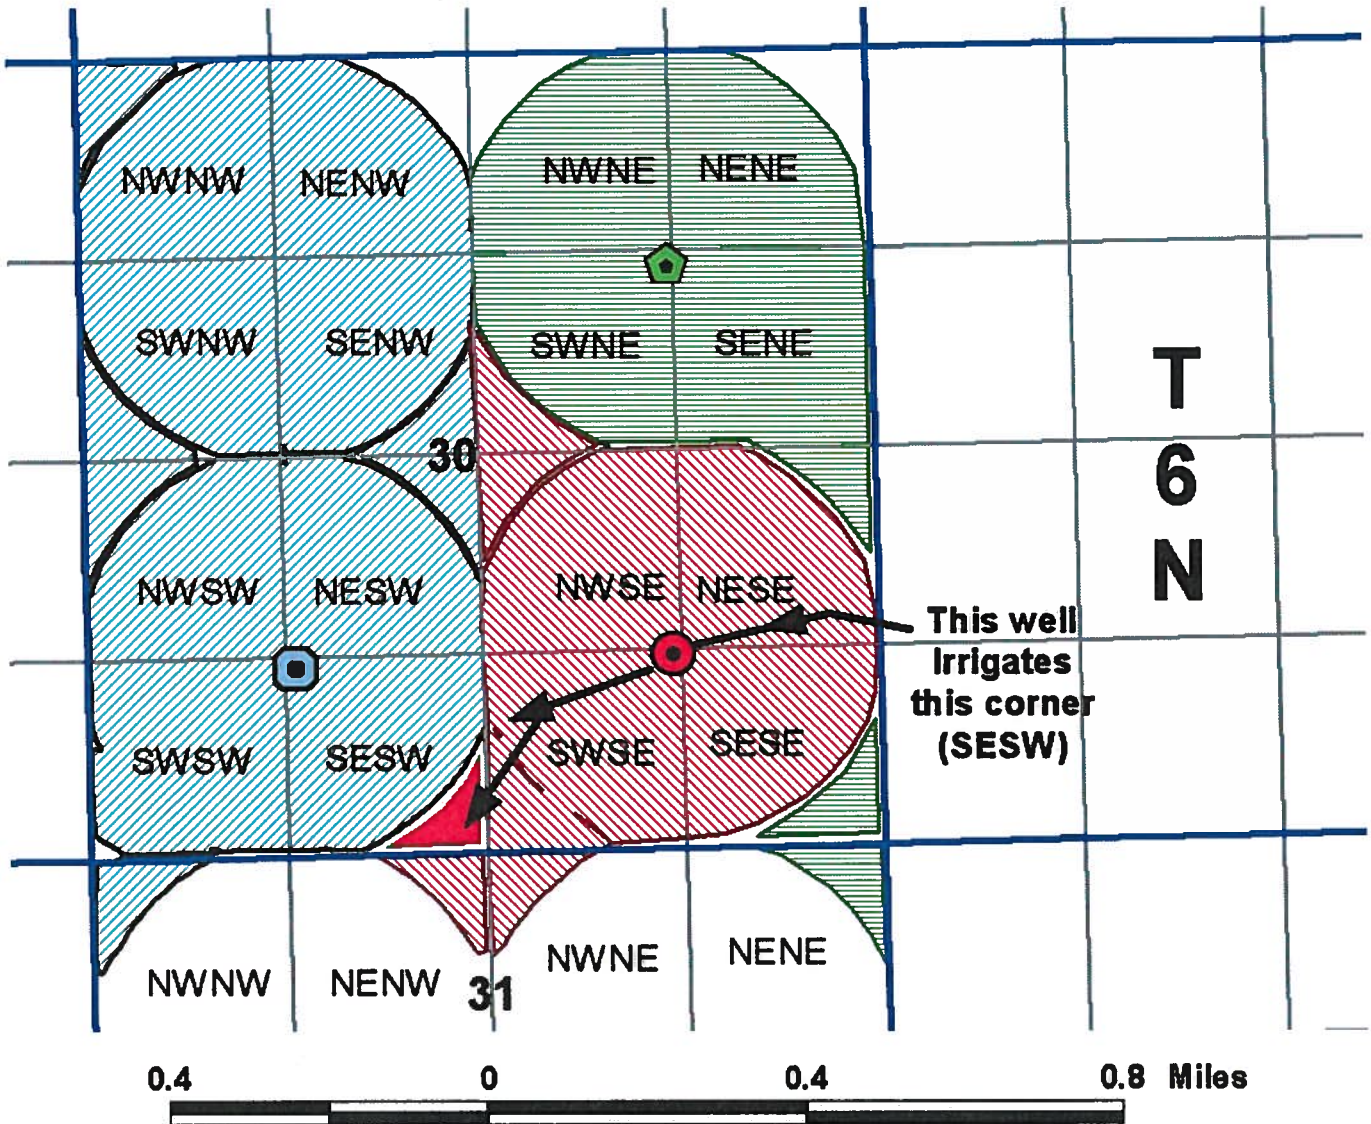

Mr. Wood should file a transfer for 31-7560B to move water to the SESW Sec 30. He may have to reduce the total acres under 31-7560B, then file the licensing amendment for 31-7567 changing the place of use to cover the 320 acres under the new shape. By filing the transfer as proposed he will take care of 31-7560B. I'm not sure he would like to reduce acres under 31-7560B, but I based this recommendation on using the earliest priority (31-7567) covering the place of use. Do you see a better way the accommodate Mr. Wood?

Hopefully, you can understand this convoluted e-mail.

Subject: Field Report for 31-7567 (Lynn Wood)

Keith,

Lynn Wood may contact you to discuss your field report for 31-7567. He wants to show you that he irrigated more pivot corners than you reported. I have the file on call-up for May 10. If you meet with him before then, please send me a memo with your recommendations.

Thanks.
