RE: Water Right Permit No. 2-07400

Dear Ms. Wootan:

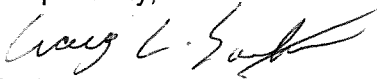

The Department of Water Resources received the replacement application for amendment for permit 2-7400 on February 25, 2013. The submitted amendment listed a place of use for 3.3 acres and a total diversion rate of 0.07 (cubic feet per second (cfs)). After consulting with the Section Manager before issuing the final license, the Department feels that we could support a greater diversion rate of 0.10 cfs by identifying the entire 6.3 acres irrigated as part of the authorized place of use under this right. This isn't a big change, but it would be to your benefit.

Unfortunately, it will require you to re-submit another updated permit amendment to replace the last one. **I am extremely sorry for the inconvenience.** I am sure you must be frustrated with the request for another updated permit amendment, but I do think that this would be to your benefit in the long run.

With that said, you are not required to submit the updated permit amendment. If you choose not to amend the permit, the Department can still issue the license for 0.07 cfs on 3.3 acres.

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. By submitting the enclosed application for amendment, IDWR will consider it a request to withdraw the amendment received on February 25, 2013, and replace it with the new amendment. **Fees paid under receipt C094917 will be applied to the current application for amendment so no additional fee is required.** If you have any questions, please myself at (208)287-4920 or Sandy Hemenway at (208) 287-4920.

Respectfully,

Craig L. Saxton
Water Rights Supervisor
