Craig,

13-7761 was protested by PacifiCorp. The protest was resolved when Mr. Wilde explained that the permit was being used to provide water to the same cows already covered under rights 13-7558 and 13-7588. Combined use conditions were added to permit 13-7761. We will handle the license from our office. The stock trough can be seen in aerial photography in the SWNENE of Section 8. Mr. Wilde provided the GPS location of the spring in his original filing. We should have enough information to handle this one in-office.

Thanks

James

Hey James,

We received proof of Beneficial use for 13-7761 which is a stockwater permit from a spring in the name of Jay Wilde. Because it technically fits within the in-house review criteria, Jean conducted her review to move forward to licensing. However, we see that this permit was involved in a protest. Because of this, I think we need to verify beneficial use by a field exam. Or, if you all at Eastern know enough about the development from your involvement in the protest resolution to feel comfortable with issuing a license, great.

So, for now, we will just process the proof and then file it on the Vault Shelves. It won't go on our radar for a field exam in the near future since we will be working on the older ones. I just wanted to bring it to your attention as an FYI.

Thanks,
Craig

D. FLOW MEASUREMENTS

Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calibration Date
N/A						

Measurements N/A

E. NARRATIVE/REMARKS/COMMENTS

STOCKWATER USE: is for up to 870 range cattle or 520 cow/calf pairs.

Diversion rate when combined with 13-7558 and 13-7588 shall not exceed a total diversion rate of 0.08 cfs or a total annual maximum diversion volume of 11.7 af.

Have conditions of permit approval been met? ☒ Yes ☐ No

F. FLOW CALCULATIONS

Measured Method: ☐ Additional Computation Sheets Attached
ALLOW PERMIT RATE

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation: N/A

VI.R. = (Acres Irrigated) x (Irrigation Requirement) =

VD.R. = [Diversion Rate (cfs)] x (Days in Irrigation Season) x 1.9835 =

V = Smaller of VI.R. and VD.R. =

2. Volume Calculations for Other Uses:

H. RECOMMENDATIONS

1. Recommended Amount

BENEFICIAL USE	PERIOD OF USE		RATE OF DIVERSION ANNUAL	
	From	To	Q(cfs)	V(afa)
STOCKWATER	01/01	12/31	0.02	11.7
TOTALS			0.02	11.7

2. Recommended Amendments

☐ Change P.D. as reflected above ☐ Add P.D. as reflected above ☒ None
☐ Change P.U. as reflected above ☐ Add P.U. as reflected above ☐ Other

Date 1/23/2013
Date

Craig wants Eastern to conduct the field exam. Since there was a protest over concern of additional depletion in the Bear River drainage. Protest was withdrawn w/ conditions and we need to make sure conditions are met.
