RE: Water Right Permit No. 74-15846

Dear Permit Holder(s):

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the following elements were developed differently than described on your permit:

The place of use (Fish Screen) and Point of Diversion were located in the NWSW of Section 35, Township 21 North, Range 23 East, instead of the NENESW of Section 35, Township 21 North, Range 23 East as listed on the permit. Please see the attached map. This is the diversion that was moved downstream on Whimpy Creek.

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$100.00 filing fee within 14 days.

If you have any questions, please call me at (208) 287-4856.

Sincerely,

A handwritten signature in black ink, appearing to read "Daniel A. Nelson".

Daniel A. Nelson
