

MEMORANDUM

Date: February 04, 2013
To: Water Right File 23-7169
From: jcefalo
Re: Field Report Narrative

Field exam completed in 2001. Examiner found a recreation pond with a surface area of 1.7 acres and a volume of 10.0 acre-feet. Pond was developed on irrigation place of use described in 23-19D, 23-20B, 23-47D, and 23-93B. These irrigation rights were decreed in 2005. Water user has essentially converted irrigation acres to evaporation mitigation for the pond.

Permit included a condition requiring a measuring device at the point of diversion. The previous watermaster for WD01, Ron Carlson, prepared a memo stating that a measuring device is not needed. The current watermaster for WD01 stated that a measuring device is still not needed. Condition will be changed to state that a measuring device may be required in the future. The evaporation mitigation condition has also been changed to reflect the Ron Carlson Memo dated April 24, 1997.
