Re: Kip Hunter Transfer for 35-2824

Dear Mr. Cefalo:

It is proposed to transfer ground water right 35-2824 to a new place of use. It is proposed the POD will be changed to Township 07 South Range 29 East Section 5 NWNE. The proposed POD is located in ESPA Model cell 84 92.

The nature of use, period of use and ownership will not be changing with this transfer. However, the proposed POU is on property owned by Lance Funk. It is expected that the ownership of 35-2824 will be changed after the transfer is approved. A property ownership affidavit will be signed by Lance Funk and submitted to IDWR.

Analysis of this transfer was performed with the ESPA Model. It was determined that due to the "2 Part Test Caveat" for the transient state analysis. No mitigation will be required due to this transfer.

Historical use of 35-2824 have been verified by affidavits and power records from the ground water well. The ground water well has historically provided the water for 35-2824 through 2009. In 2010, water from the Aberdeen Canal Company have been applied to the ground covered by 35-2824. Water right 35-2824 was accepted into the Idaho Water Supply Bank as primary groundwater for 2012. Water right 35-2824 was released from the Idaho Water Supply Bank in the fall of 2012 in preparation for this transfer.

Please copy our office on all correspondence regarding this application.

Sincerely,

Greg Sullivan, M.S.

Cc: Kip Hunter, Lance Funk
