

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APPLICATION FOR EXCHANGE OF WATER

Under the provisions of Section 42-240, *Idaho Code*, any person holding a surface water right may apply to exchange such water for the use of water from the same source or a different surface water source. Surface water right holders may also apply to exchange for the use of water authorized for diversion under one or more other valid water rights from the same source or a different surface water source.

1. INFORMATION ABOUT THE APPLICANT

Applicant Consolidated Irrigation Company Telephone No: _____
(Name of Applicant)
33 S. 1st E. Preston, ID 83263 Email: _____
(Mailing Address) (Zip Code)

Applicant's Water Right(s) to be exchanged Water Right Nos. 13-2022, 13-2102, and 13-2287 (Worm Creek water rights) exchanged with 13-2288A (Cub River water right).
Attach a photocopy of the License, Permit, Transfer, Decree, or Claim evidencing the right(s) or attach a printout obtained from IDWR.

2. INFORMATION ABOUT THE CO-APPLICANT

Complete this portion if the applicant proposes to exchange for water diverted under a water right held by another party. The co-applicant is the holder of the right to be exchanged for the applicant's right. If more space is needed, please attach another sheet containing information about each co-applicant.

Co-applicant _____ Telephone No: _____
(Name of Co-applicant)

(Mailing Address) (Zip Code) Email: _____

Co-applicant's Water Right(s) to be exchanged _____
Attach a photocopy of the License, Permit, Transfer, Decree, or Claim evidencing the right(s) or attach a printout obtained from IDWR.

3. EXCHANGE AGREEMENT – Attach a copy of the written agreement between the applicant and the co-applicant(s).

4. EXCHANGE INFORMATION – Complete Part A or Part B to explain how the proposed exchange will operate.

Part A – For an exchange involving two or more water right holders.

The applicant proposes to divert _____ cfs and/or _____ acre feet per year of water authorized to be diverted under the co-applicant's water right(s) listed above at _____ $\frac{1}{4}$ of _____ $\frac{1}{4}$, Govt. Lot _____ Sec. _____ Township _____ Range _____ B.M., _____ County.

Additional points of diversion, if any: _____

In exchange for authorization to divert water as described above, _____ cfs and/or _____ acre feet per year of water authorized for diversion under the applicant's water right(s) listed above will be (complete 1 or 2 below):

- made available to the co-applicant for diversion at _____ $\frac{1}{4}$ of _____ $\frac{1}{4}$, Govt. Lot _____ Sec. _____ Township _____ Range _____ B.M., _____ County.
Additional points of diversion, if any: _____

OR

- released from storage by the co-applicant into _____ at _____ $\frac{1}{4}$ of _____ $\frac{1}{4}$, Govt. Lot _____ Sec. _____ Township _____ Range _____ B.M., _____ County.

Part B-- For an exchange involving only the applicant's water right(s).

The applicant proposes to divert 20 cfs and/or 800 - per acre feet per year of water at NE $\frac{1}{4}$ of NW $\frac{1}{4}$, Govt. Lot _____ Sec. 8 Township 15S. Range 41E. B.M., FRANKLIN County. Additional points of diversion, if any: _____

In exchange for authorization to divert water as described above, _____ cfs and/or _____ acre feet per year of water authorized for diversion under the applicant's water right(s) listed above will be (complete 1 or 2 below):

1. diverted from Worm Creek at NW $\frac{1}{4}$ of SE $\frac{1}{4}$, Govt. Lot _____ Sec. 10 Township 15S. Range 40 E. B.M., FRANKLIN County and injected into Glendale Reservoir at SE $\frac{1}{4}$ of SW $\frac{1}{4}$, Govt. Lot _____ Sec. 8 Township 15S. Range 40E. B.M., FRANKLIN County.

OR

2. released from storage by the applicant into _____ at _____ $\frac{1}{4}$ of _____ $\frac{1}{4}$, Govt. Lot _____ Sec. _____ Township _____ Range _____ B.M., _____ County.

Additional Explanation – Attach additional sheets if necessary.

See attached sheet.

If this exchange is not intended to be a permanent arrangement, please describe the circumstances under which the proposed exchange will terminate. The exchange is intended to be permanent.

5. MAPS -- Attach two maps, one showing the water right(s) as it is (they are) now used, and another showing how the water right(s) will be used under the proposed exchange. Each map should be on an 8½"x11" sheet and should clearly identify the locations of the point(s) of diversion, injection, and re-diversion of water and the place(s) of use by 40-acre subdivisions, section, township and range of the public land survey. Photocopies of USGS 7½-minute topographic quadrangles are preferred as base maps.

SIGNATURE

Applicant hereby asserts that no one will be injured by such exchange of water and acknowledges that the applicant and/or the co-applicant will be responsible for all actions taken pursuant to this exchange. I understand that any willful misrepresentations made in this application may result in voiding its approval.

EXCHANGE APPLICATION

PART B: Additional Explanation

This exchange application seeks an exchange of storage water rights, all owned by the Consolidated Irrigation Company ("CIC"). Specifically, the exchange application seeks use a small portion of Cub River water (Water Right No. 13-2288A, which has historically been used to fill Glendale Reservoir) to fill Johnson Reservoir. In exchange, CIC will use Worm Creek water Reservoir (Water Right Nos. 13-2022, 13-2102, and 13-2287, which has historically used to fill Johnson Reservoir) to fill Glendale Reservoir.

This exchange practice has been in place for over sixty (60) years when two of the predecessor entities to CIC (the Preston-Whitney Irrigation Company and the Preston-Whitney Reservoir Company) began exchanging water just as the proposed exchange application proposes. See *Amendment to Agreement* (dated October 13, 1975) attached hereto (which amends the original October 13, 1951 agreement). The exchange was effectuated through the local watermaster. However, CIC was informed by Tim Luke of IDWR that this exchange needed to be documented through an official approved IDWR exchange application. The need to document this exchange is also necessary now that CIC is seeking to construct a new hydropower facility, as further described below.

CIC is in the process of obtaining authorizations to construct a hydropower facility on a portion of its delivery system just east of the upper end of Glendale Reservoir. The proposed hydroelectric facility will use water delivered through two of its already-existing canals—the Glendale Canal and the Mink Creek Canal—to provide the head necessary for the generation of electricity. Pipelines will be installed at the lower end of the Mink Creek Canal at an intake, and all water from Mink Creek will go through the hydroelectric facility. The pipeline for the Glendale Canal will be next to it to allow for use of water for hydropower, and to allow additional flows to bypass the pipeline intake to fill Glendale Reservoir and/or be used through CIC's system as authorized under its water rights.

As part of this project, CIC desires to obliterate a portion of a canal known as the Johnson-Lamont Fill Ditch. The heading of this ditch is on Worm Creek (NENW Sec. 8, Twp. 15S., Rge. 41E.B.M.), but down the ditch, it can receive Cub River water from the Glendale Canal. The water rights which allow for the filling of Johnson Reservoir (Water Right Nos. 13-2022, 13-2102, and 13-2287) only allow diversion of water from Worm Creek. With the obliteration of the upper portion of the Johnson-Lamont Fill Ditch, Water Right Nos. 13-2022, 13-2102, and 13-2287 will not be able to be physically diverted to fill Johnson Reservoir with Worm Creek water.

CIC also holds a water right (Water Right No. 13-2288A) which allows diversion of water from Cub River to fill Glendale Reservoir. It is proposed that a portion of Water Right No. 13-2288A be allowed to bypass its historic injection point into Worm Creek (which would then flow down Worm Creek to fill Glendale Reservoir) and instead allow this Cub River water to be used to fill Johnson Reservoir whenever the Johnson Reservoir Worm Creek water rights (Water Right Nos. 13-2022, 13-2102, and 13-2287) are in priority.

In exchange for the Cub River water (diverted under Water Right No. 13-2288A) filling Johnson Reservoir, the Worm Creek water (diverted under Water Right Nos. 13-2022, 13-2102, and 13-2287) will bypass its historic diversion point and flow into Glendale Reservoir to be stored and eventually used during the irrigation season within the Glendale portion of the CIC system.

To protect against enlargement or injury to other water right users, the exchange will only occur when the Worm Creek water (Water Right Nos. 13-2022, 13-2102, and 13-2287), or a portion thereof, is in priority on Worm Creek. When these rights are entirely out of priority on Worm Creek, no Cub River water can be used to fill Johnson Reservoir with storage water. The Cub River water will then only be used to fill Lamont Reservoir (Water Right No. 13-2291) with storage water, Foster Reservoir (Water Right No. 13-2298) with storage water, or Glendale Reservoir (Water Right Nos. 13-2022, 13-2102, and 13-2287) with storage water. The exchange will not result in the use of more Cub River water than has been historically diverted from Cub River, but will only change where the water is stored.

Also, to ensure accurate measurement, there is a rated section of Worm Creek just upstream from the historic diversion point for the Johnson-Lamont Ditch. See attached photos (Figure 15—Rated Section on Worm Creek above PW Upper Fill Ditch Injection point to Worm Creek; Figures 19 & 20—Lamont-Johnson Diversion location). This rated section has recently been re-rated to ensure accuracy. A number of measuring devices will also be used on the hydropower pipelines. On the tailrace of the turbine, there will either be a weir with a data logger, or an area velocity flow meter. Above the hydropower facility, there will be a mag meter or a McCrometer to measure flow rate from each leg of the pipeline (the Mink Creek leg and the Cub River leg).

We have attached a map showing the location of the various structures identified in this summary. We have not included the maps called for in item 5 of the Exchange Application because the water rights will be used within the same Consolidated Irrigation Company service area. Nothing will change as to where the water will be used, only where the water is stored.

Earl

AMENDMENT TO AGREEMENT

WHEREAS, on October 13, 1951, the PRESTON-WHITNEY IRRIGATION COMPANY, hereinafter referred to as Irrigation Company, and the PRESTON-WHITNEY RESERVOIR COMPANY, hereinafter referred to as Reservoir Company, entered into a Cooperative Agreement providing for the joint use of a canal from a diversion on Worm Creek to the Johnson and Lamont Reservoirs, and also to the exchange of water between the two companies; and

WHEREAS, the two companies have cooperated for their mutual benefit for a number of years and desire to continue that cooperation; and the Officers and Directors of each company have determined that it is in the best interests of both companies to enter into a compromise settlement by this Agreement in return for the Reservoir Company withdrawing its pending protest; and to continue the operations between the two companies in the same manner as in the past.

NOW, THEREFORE, for value received the Irrigation Company and Reservoir Company amend the Agreement dated October 13, 1951, by the addition thereto of the following:

1. DIVISION OF WORM CREEK WATER

The rights of parties hereto in and to the waters of Worm Creek shall be divided as follows:

A. Storage Season

(1) During the period of time between the termination of irrigation in the fall of each year, and the following April 15th of each year or commencement of irrigation season, whichever event occurs last, the Reservoir Company shall be given credit by the Irrigation Company for up to the first 10 C.F.S. of water flowing from Worm Creek past the Reservoir Company's point of diversion due to snow and ice blockage in the Reservoir Company's diversion canal in the early spring months. It is understood that the water thus flowing by the Reservoir Company's point of diversion runs into and is stored in Irrigation Company's reservoirs. The credit thus accumulated by the Reservoir Company for Worm Creek water stored in the Irrigation Company's reservoirs shall be repaid for up to one filling of the Reservoir Company's Reserve at a capacity of 730 acre feet by the Irrigation Company with water from Cub River or other sources as determined by the Irrigation Company by diverting such amount of water into Johnson Reservoir.

(2) At its option, the Irrigation Company may in the fall of the year, divert water from Cub River into Johnson Reservoir as estimated credit the Irrigation Company will owe the Reservoir Company pursuant to the terms of this Agreement for early run off of Worm Creek water the following spring.

(3) At such time as the Reservoir Company commences diverting Worm Creek water into its diversion canal, it is understood and agreed that the Reservoir Company shall be considered as having prior right to the use of the first

10 cubic feet per second of water capacity of the canal when there is that amount of water in Worm Creek, or whatever the size its portion of the diversion canal may be enlarged to, of the water of Worm Creek during the water storage season until Johnson Reservoir is full. The Irrigation Company is considered as having right to the next 15 cubic feet per second water capacity of the canal.

B. Irrigation Season

(1) In the event Johnson Reservoir is not full prior to April 15, of each year or commencement of irrigation season as defined herein, whichever event occurs last, the Reservoir Company and Irrigation company shall equally divide the flow of Worm Creek (after allowing for the rights of other appropriators having a higher priority than the parties hereto and which are located above the Reservoir Company's point of diversion) until such time as the Johnson Reservoir is full or the flow of Worm Creek decreases to 5 C.F.S. The remaining 5 C.F.S. may be used by the Irrigation Company.

For the purposes of this Agreement, Irrigation season shall be defined as the point in time when the amount of water being discharged from the Irrigation Company's reservoirs is greater than the amount of Worm Creek water flowing into the Irrigation Company's reservoirs.

(2) At such time as the filling of Johnson Reservoir is completed, the Irrigation Company shall be entitled to any flow remaining in Worm Creek.

C. Measuring Devices

It is agreed that upon request of either company adequate measuring devices will be installed where necessary to effectuate the division of Worm Creek water, and the costs of installation and inspection shall be divided according to the benefit to each company.

2. DEFAULT PROVISIONS

In the event either party hereto defaults in the performance of the terms of this Agreement the other party may bring an action to enforce this Agreement. In the event either party hereto shall be required to file suit to enforce this Agreement, or to adjudicate rights as the result of a default, the defaulting party agrees to pay the prevailing party's reasonable attorney's fees and costs of suit.

3. WITHDRAWAL OF PROTEST

The Reservoir Company hereby agrees to withdraw its protest to the Irrigation Company Claim identified as No. 13-0271 on the Worm Creek Adjudication presently being conducted by the IDAHO DEPARTMENT OF WATER RESOURCES.

DATED This 13th day of October, 1975.

IRRIGATION FROM STORAGE Use:

Acre Limit: 15708.9

Place(s) of use: Large POU Info

Conditions of Approval:

1.	172	The boundary encompassing the place of use for this water right is described with a digital boundary as authorized by Idaho law. The data comprising the digital boundary are stored in the electronic document management system of the Department and are incorporated into this approval by this reference. A map depicting the place of use is attached to this approval document to illustrate the place of use described by the digital boundary.
2.	X35	Rights 13-2108, 13-2288 and 13-2288A when combined shall not exceed a diversion to storage rate of 215.0 cfs, and an annual storage volume of 6000.0 acre feet.
3.	X35	Rights 13-2288, 13-2288A and 13-2108 when combined shall not exceed the irrigation of 15708.9 acres.
4.	R05	Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 13-A.
5.	R43	The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion(s).
6.	R59	This right when combined with all other rights shall provide no more than 3.5 afa per acre at the field headgate for irrigation of the place of use.
7.		Storage facility is known as Glendale Reservoir.
8.	R40	The storage of water under this right is contingent upon continued certification by the Department of Water Resources under the dam safety provisions of the Idaho Code, authorizing storage.
9.	004	This right does not grant any right-of-way or easement across the land of another.
10.	T07	The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
11.	T08	Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
