RE: Water Right Permit No. 74-07368

Dear Permit Holder(s):

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the use of water allowed under the permit can be authorized in accordance with Section 42-211, Idaho Code. However, before a license can be issued, your permit must be amended to document your water use as it was actually developed.

Based on the examiner's report, the following elements were developed differently than described on your permit:

- 1) Point(s) of Diversion**
- 2) Place(s) of Use**

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully along with the attached map. If you concur with the information presented, please sign the form and return it with the \$100.00 application fee within 14 days.

If you have any questions, please call me at (208) 287-4924.

Respectfully,

ROB WHITNEY
Water Compliance Bureau
