Subject: 85-15695 US Army Corps of Engineers (water right)

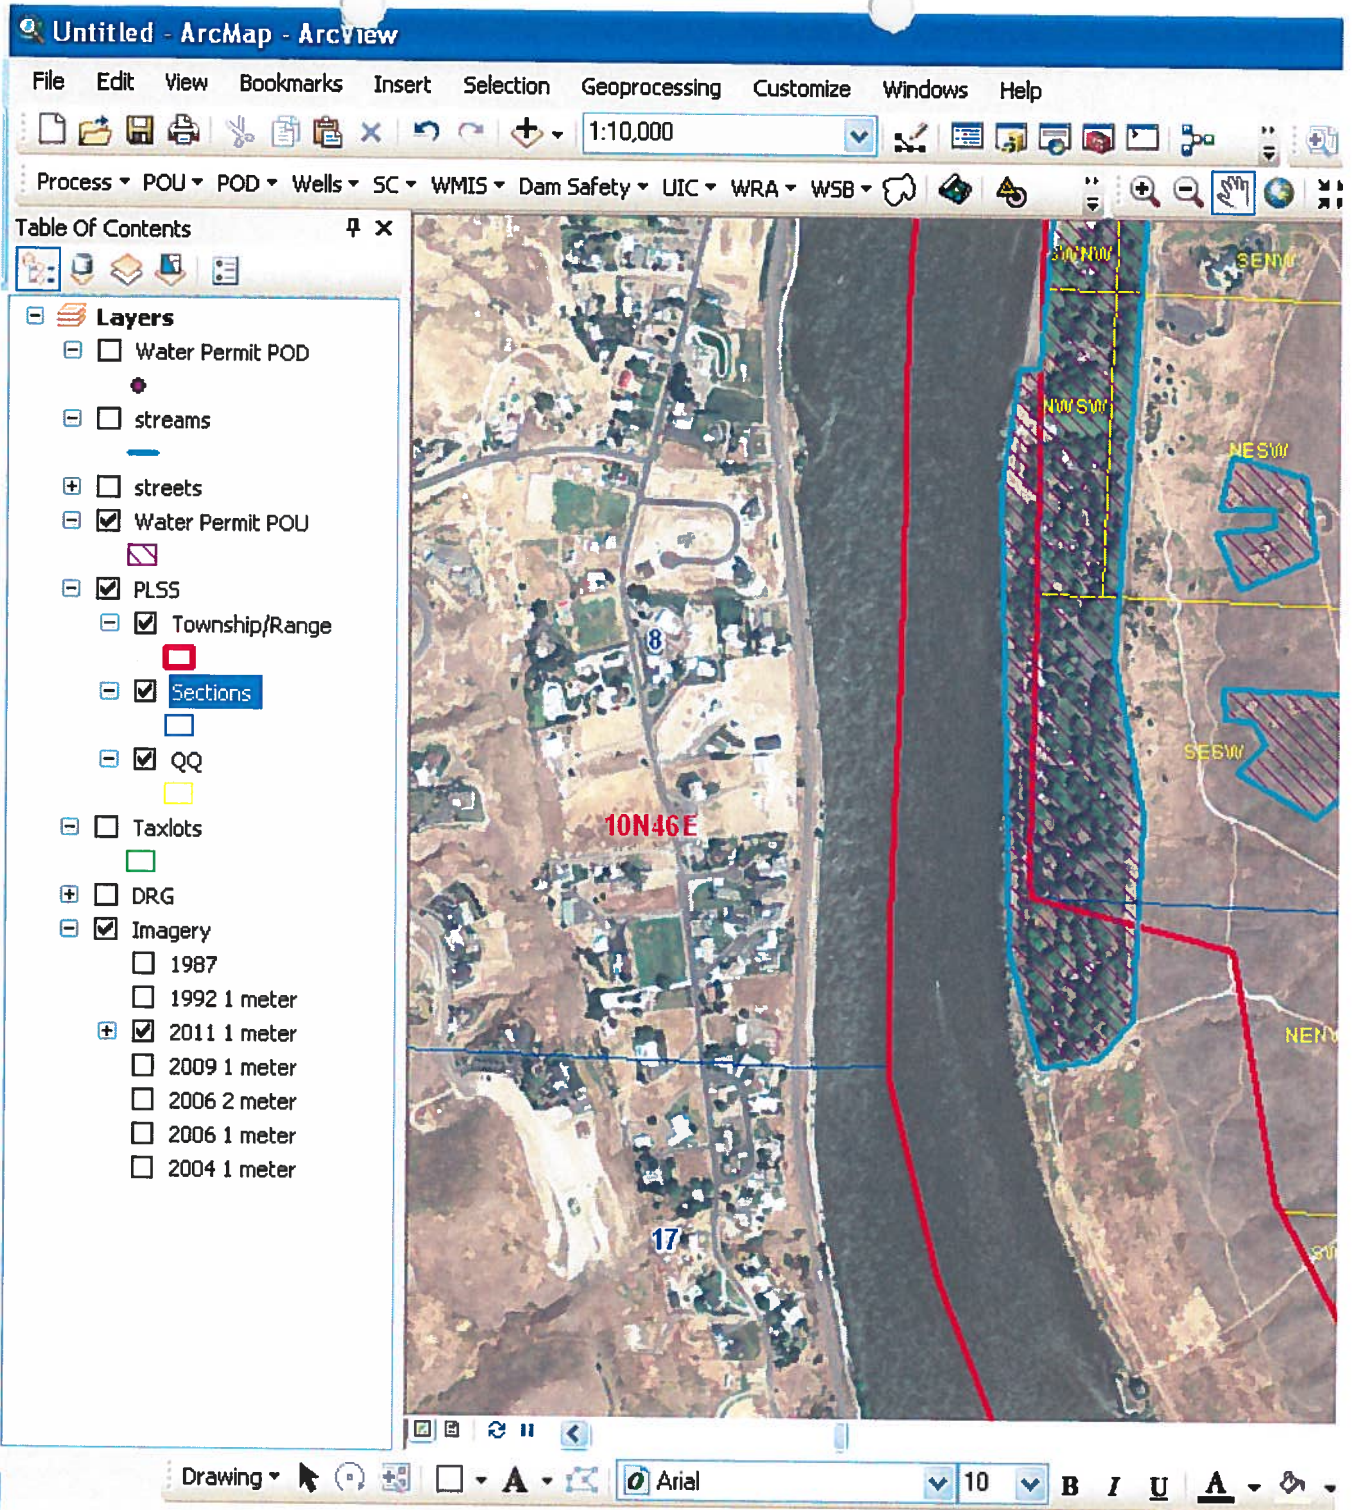

Doug,

I am currently reviewing the water right permit 85-15695 US Army Corps of Engineers, for completing the licensing process for 55 acres irrigation. The proof of beneficial use indicates that you are the contact person for accompanying me during the field examination that I need to schedule. I will be in that area May 16 – 17th, 2012, and was wondering if I could make an appointment to meet you or someone else who could show me the well, and distribution system, and allow me to take a physical measurement and some pictures.

Some information I do need on the system is the following:

- (1) Copy of the well drillers report (one could not be found on file)
- (2) Horsepower and make of the pump/motor, and serial number if known
- (3) Static level, depth of well, size of casing, size of discharge
- (4) Psi that the system runs at
- (5) Size and type pipe, if the distribution is buried
- (6) Detailed directions from Grangeville to get to this location.

Request to schedule a Field Exam
