Section 42-1412(6), Idaho Code.
2. N08 The quantity of water decreed for this water right for stockwater use is not a determination of historical beneficial use.
3. N05 The quantity of water under right nos. 22-13544, 22-14078, 22-14079, and 22-14080 when combined shall not exceed 0.02 cfs or 13,000 gallons per day for stockwater use.

Comments:

1. mhollday 2/11/2013 12:00:00 AM ownership split
Comment: Research indicated that the pou shape for parent right 22-13544 needed to be corrected in order to reflect the evidence in the file. The previous shape file made no sense based on the system configuration as described in the AJ file. I sent a letter to the five parties that would potentially be impacted by the change. Those who responded were in agreement with the proposed correction, so the shape was corrected. While 20 acres was decreed to the NESE, only 15.2 acres is actually irrigated by the system in that QQ. This ownership change reflects a proportionate share of those 20 acres based on the decree even though the shape is undersized. Since 0.02 cfs was decreed for stockwater on the parent right, it is now necessary to add combined limits for the splits limiting the total use between the rights to 13,000 gpd.
