Re: POD and POU Location

Today, a map was scanned and emailed to Nancy Wootan at nancywoo1@mindspring.com. Nancy is the present owner, and was the wife of Marv who had originally accompanied Cindy Hodges/Yenter during the 6/6/1996 field examination (Marv has since passed away). In a phone conversation via (208) 366-2389, with Nancy, she confirmed the POU and POD shapefiles. The reason for doing this was due to Arc Map not being available years ago, and to be able to accurately determine the actual acres irrigated, and the actual shape for the sloped acres.
