Subject: FW: 37-8502 mitigation

Chuck,

Thanks for your efforts to understand and address these issues. I am forwarding this to staff so we can get the license issued.

There is one final formality that I think we can address pretty quickly. When using another right for mitigation purposes, we generally have the water right owner submit a signed statement approving use of the right for mitigation and authorizing modification of the water right record to reflect the mitigation portion. In this case, I'll accept the authorization through a response to this email from Donna or her designated representative.

Thanks,

Jeff
