Subject: FW: Supplemental Technical Report on Annual Volume for Water Right License No. 37-08575A
Attachments: 37-8575A Amend v3.pdf

Scott,

The Department has reviewed Brockway Engineering's updated report on the annual volume of water for Water Right No. 37-8575A, the snow making right for Mt. Baldy. The Department concurs that 456.3 AF is appropriate. I have attached a revised application for amendment. If everything looks in order to you and your client, please submit the amendment request with the \$100 filing fee to pave the way for issuance of a license.

I'd be happy to meet with you to discuss the right, although I don't anticipate any areas of concern at this point.

Sincerely,

Shelley

Shelley Keen

Subject: Re: Supplemental Technical Report on Annual Volume for Water Right License No. 37-08575A
Importance: High

Dear Shelley:

I am providing you with the final Supplemental Technical Report prepared by Brockway Engineering. This report analyzes the actual operation of the snowmaking system on Mt. Baldy and derives a more accurate calculation of the amount of water needed to produce a ski surface if no appreciable natural snow is available. The Sun Valley Company strongly believes this calculation produces the most accurate indication of the amount of water which will be necessary for snowmaking if a repeat of the 1976-77 drought period occurs.

In view of the critical importance of the Department's decision regarding the annual volume limitation for the licensing of this water right, the Sun Valley Company desires to meet with the Department officials to provide additional information and clarification of any questions remaining after the Department's review of the Brockway Supplemental Technical Report. If the Department has any reservations with the final calculation of 453+ acre feet of water for the annual volume of this water right, I respectfully request that we be provided with the opportunity to meet with you and seriously discuss these issues.

Thank you for your anticipated cooperation in this matter.

Best regards,

Scott
