DEPARTMENT OF WATER RESOURCES****REQUEST FOR EXTENSION OF TIME**

To provide additional time in which to submit proof of beneficial use for a water right permit

The Idaho Department of Water Resources will consider this form as a request that the permit holder(s) be granted an additional period of time under the provisions of Section 42-204, Idaho Code in which to complete development of a water right and file proof of beneficial use of water. There is a **FILING FEE of \$50.00** to be included with this form when filed with IDWR.

Describe what work has been completed toward the development of this water right:

If no work has been completed, show "none".

The permit issued April 5, 2012, authorizes the development of groundwater for irrigation, domestic, stockwater, fire protection, and commercial purposes. The well was drilled and all necessary infrastructure serving domestic, stockwater, fire protection, and commercial purposes is installed and operational. All that remains is the design and installation of a well-based irrigation system for the 80-acre property.

Costing Improvements installed to date cost approximately \$77,217.20.

The permit holder(s) has been unable to complete the remainder of the work for the following reasons:

The permit holder is currently in a legal dispute with a neighboring landowner and that neighbor's lessee. The dispute involves the ditches and facilities used to deliver surface water from the Farmers Union Canal to the Permit Holder's property for irrigation purposes. Resolution of the surface water delivery dispute must be reached prior to the design and installation of the well (permit)-based irrigation system on the property. To do otherwise would be premature and risk unnecessary waste and expense.

Permit holder(s) request an extension to April 1, 2018**.
