Re: Attempts to Schedule Field Exam

On 5/24/2012, Frank Capito was contacted by phone (208)691-9933/926-4326 to schedule a field exam. Frank stated that right now the water was really high, and he was unable to put the pump in the river without it washing away. He stated that he also had leukemia and was undergoing treatment, and requested that we call back in August to schedule a field exam.

Today, I called Frank, and he stated that he sold the pump and was in the process of purchasing another pump, he requested having until the middle of October 2012 to submit all information requested about the system, pump, pictures, and diagrams. An email was sent to him this morning at: frankdebicapito@dishmail.net with all items needed, along with an aerial map and address change form. On the email, it was requested that all information be submitted to the department by 10/15/2012.
