Subject: 81-11981 Capito, request to submit additional information and confirmation of completion of conditions

Frank and/or Debi,

This email is to remind you of the information that is still needed prior to being able to issue a license on permit 81-11981.

The Proof of Beneficial Use was received by the department on 1/29/2008, which indicated that the system had been completed during the development period. The permit had stipulated conditions which were to have been met during the development period, but at the time of the field examination it was confirmed they had not yet been installed. For this reason, **please submit the following items by December 9, 2012, or the permit will be voided.**

- (1) Condition 115: Prior to the diversion and use of water under this approval, the right holder shall install and maintain acceptable measuring device(s), including data logger(s) at the authorized point(s) of diversion, in accordance with Department specifications. **I need a copy of the "paid" invoice and a picture of the measuring device and data logger at the point of diversion.**
- (2) Condition 029: Prior to the diversion and use of water under this approval, the right holder shall comply with all fish screening and/or fish passage requirements of the Idaho Department of Fish and Game. **I need a copy of the "paid" invoice and a picture of the fish screen.**
- (3) Condition X16: The approach velocity at the point of diversion shall not exceed 0.5 feet per second. **I need confirmation that this requirement has been met.**
- (4) Condition X15: A fish screen of ¼ inch or smaller mesh shall be installed and maintained at the point of diversion. **I need a copy of the "paid" invoice and a picture of the fish screen, confirming the mesh slot size is ¼ inch or smaller.**
- (5) Condition 01H: Prior to diversion of water under this right, the right holder shall install a lockable device, subject to the approval of the Department, in a manner that will provide suitable control of the diversion. **I need a copy of the "paid" invoice for the lockable device, and description as to where and how it will be installed, and made accessible to the water master.**
- (6) Since at the time of the field examination, you stated that you were in the process of buying a new pump, and there no longer was a pump at the point of diversion, I need a copy of the invoice showing that a pump was purchased by you. **I need the make/model, serial #, Hp, and discharge size.**

If you have any questions, please give me a call.

Thank you again for time, and all the information during the field examination.
