Re: Permit No.91-7426 (Lapse Notice)

Dear Ms. Block,

Thank you for your help last week in following up on my questions on Water Permit and Lapse Notice. I am writing in response to a letter from Mr. Pepperstack dated November 8, 2012 in regard to a Lapse Notice for the referenced permit. Understanding that the permit has lapsed, I would like to reinstate the permit. Since the water was put to beneficial use prior to the date proof of beneficial use was due (November 1, 2012), I am providing that proof statement now.

I apologize for not responding by the November 1, 2012 due date. This was due to my error confusing this request on a "water right permit" with a water right application I had begun on your web site and the Permit to Appropriate Water I later applied for. I realize this was my responsibility and I should have looked closer at the document and permit number.

The water use is propagated by a suction pump with an inlet placed in the St. Joe River with the water used to irrigate the lawn. A sprinkler system has been put in place to use in conjunction with the pump. This simple pump system was in use during the summer of 2012 however the pump was dismantled from the irrigation system and stored for the winter. If the pump needs to be in place for an inspection I would request any inspection be scheduled after April 1, 2012 when irrigation is again required.

Please let me know if you have any questions or need additional information. I can be reached by phone at (509) 979-1447 or email at hlwhite50@comcast.net.

Sincerely,

Harold L. White
