

Protest of Water Transfer No. 77970 for Sally Rae Johnson

34-352 Sec 14(SW)(NE)(NW) .8CFS

34-352 Sec s4 (SESW) 16 acres .8CFS

These are not connected or reach the Big Lost River. This would set a precedent for water users that use side creeks that do not reach the river to be transferred.

The Nielsen Ditch will not handle any more water without running over the bank

The Talman Hunter Ditch is adequate for handling Miss Johnsons water. This is the ditch that handles her water to this field.

This proposed transfer will affect the other water users in the Nielsen Ditch.

This transfer could affect the futile call.
