RE: Water Right Permit No. 37-08696

Dear Permit Holder(s):

The Department of Water Resources (IDWR) is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the following elements were developed differently than described on your permit:

 X **Place(s) of Use**

Permit 37-8696 originally authorized development of 3 acres of irrigation. IDWR's review found that 37-8696 is co-mingled with 37-8811 and used on 4.2 acres. Permit 37-8696 needs to be amended before the department can issue a license describing the 4.2 acre place of use.

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$100.00 filing fee within 14 days.

If you have any questions, please call me at (208) 287-4916.

Sincerely,

Craig L. Saxton
Water Rights Supervisor
