

MEMORANDUM

Date: December 26, 2012
To: Water Right File 15-7128, 15-7132, and 15-7133
From: dcarlson
Re: Field Report Narrative

3 wells/pumps to pivots and handlines. Large combined place of use created under 3 permits: 15-7128, 15-7132, and 15-7133. Mainlines connect ground water wells to entire place of use.

Part of the place of use is in Utah. Licensing amendment combines the irrigation places of use for all three permits into a single combined place of use.

Wells were measured to have a capacity of 13.44 cfs, more than the 12.74 cfs described in the permits. Each water right will be limited to the amount listed on the permit.

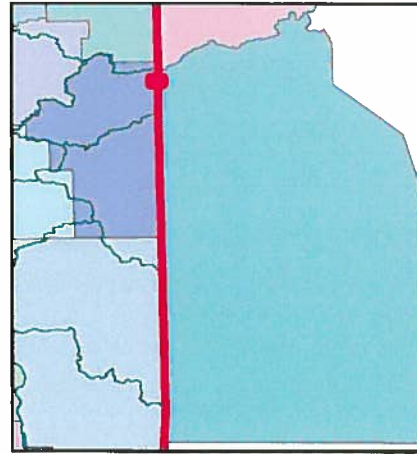

The final licensed place of use is slightly different than the place of use proposed by the field examiner. Advanced mapping technology allows us to better define the irrigated acres. All irrigated acres in Idaho are covered. Water user may be irrigating more acres in Utah than is described in the 637 acre place of use listed on the water rights.
