

MEMORANDUM

Date: January 02, 2013
To: Water Right File 37-8859
From: amerritt
Re: approval

This permit was protested. The original protests were either resolved or dismissed. It is being approved with a mitigation plan. Note that the application as originally filed just showed the storage capacity of the two ponds and did not include volume for evaporation as now is the standard. After discussing with Shelly Keen it was decided to include the 1.4 af of evaporation which is being mitigated plus the 2.5 storage volume for a total of 3.9 af for storage to comply with the current standard for describing storage rights. No amendment was sought.

The mitigation rights and the overlapping rights in the PPU were modified based on approval of this permit.
