RE: Water Right Permit No. 79-14012 and 79-14205

Dear Permit Holder(s):

I am currently conducting the licensing review on permits 79-14012 and 79-14205. These are the questions that require answers before a license can be issued:

- (1) How is irrigation conducted for the 1 acre? Describe completely.
- (2) If a pump is used, give me the make, model/serial number, Hp, discharge size, and lift.
- (3) Where is the actual location of the place of use for the 1 acre that is irrigated? (See attached map). Please outline the place of use, and indicate the location of ditches (if gravity fed), or location of pipe (indicate size/type, nozzle type and number of nozzles run at one time).
- (4) Where is the pump located? (See attached map). Mark and label on the map.
- (5) What psi is this system run at?
- (6) Please complete and return the enclosed Address Change Form, to update information (correct phone number, and add email address if applicable).

Attempts have been made to contact you directly, but the phone numbers listed in the files as your contact information have been disconnected, and no new listing was found. Please submit the above requested information within 14 days, or the permits will be **VOIDED**. You can either return the information in the self-addressed envelope, or scan the maps, and email the requested information to sandy.hemenway@idwr.idaho.gov whichever is the easiest.

If you have any questions, please call me at (208)287-4920.

Sincerely,

Sandy Hemenway
Sr. Water Resource Agent
