RE: License No. 36-7802B - Issuance of License

Dear Water Right Holder(s):

The Department of Water Resources has issued the enclosed Water Right License confirming that a water right has been established in accordance with your permit. Please be sure to thoroughly review the conditions of approval and remarks listed on your license.

The license is a PRELIMINARY ORDER issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless a party petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

Enclosed is a copy of the approved Application for Amendment.

Please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at 208-327-7946.

Sincerely,

Shelley W. Keen

Water Rights Supervisor

**EXPLANATORY INFORMATION
TO ACCOMPANY A
PRELIMINARY ORDER**

The accompanying order or approved document is a "**Preliminary Order**" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources (department) unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the department or the Idaho Water Resource Board (Board) is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

RE: Water Right Permit 36-07802B

Dear Permit Holder(s):

I previously forwarded to you an Application for Amendment so that you could amend your permit to depict your water right as it has actually been developed.

As of this date, I have not received this amendment. If I do not receive the amendment within 14 days, a Water Right License will be issued for less than could have been allowed. In case the amendment form I sent you has been misplaced, a new one is enclosed. Please note that the filing fee for this amendment is \$50.00.

If you have any questions regarding this matter, please call me at 208-327-7944.

RE: Water Right Permit No. 36-07802B

Dear Permit Holder(s):

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the following elements were developed differently than described on your permit:

Place(s) of Use

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$50.00 filing fee within 14 days.

If you have any questions, please call me at 208-327-7944.

Sincerely,

KAY WALKER

Comment Report

36-7802B

1. kwalker 1/16/2002 Place of Use

Comment: The place of use recommended to be licensed covers the 433 acres decreed under 36-15121 and 36-2432B which are diverted from the same wells as under this proposed license. Examiner recommended we license this permit for only the 89.4 acres that were not covered under the decreed rights. I recommend we allow 89.5 acres under this permit - I rounded the .9 acre recommended in SWSE to 1 acre.

2. kwalker 1/18/2002 Rate of Diversion

Comment: Examiner recommended we allow 1.25 cfs for the 89.4 acres he recommended to be licensed. I found we could allow 1.40 cfs for this additional 89.5 acres. Rights 36-2432B and 36-15121 are for 433 acres and 6.79 cfs which is 0.0157 cfs per acre times 89.5 acres = 1.40 cfs.

Dear Water Right Claimant(s):

The reverse side of this letter contains a copy of an *Order Amending Irrigation Period of Use Element in Partial Decree and Incorporating into Partial Decree An Express Statment Regarding General Provisions, Nunc Pro Tunc* (hereinafter "*Order*") for water right number 36-02432B. According to Idaho Department of Water Resources (IDWR) records, you are the current owner of this water right. If you are not the current owner, please contact IDWR immediately at:

Idaho Department of Water Resources
1301 North Orchard
Boise, ID 83706
800-451-4129

The Purpose of the *Order* is to set forth beginning and ending dates for the irrigation period of use for this water right. As stated in the face of the *Order*, this action was necessary following the decision of the Idaho Supreme Court in *A&B Irrigation Dist. v. Idaho Conservation League*, 131 Idaho 411, 423, 958 P.2d 568, 580 (1998). This *Order* also incorporates into the *Partial Decree* an express statement that the *Partial Decree* is subject to such general provisions necessary for the definition or for the efficient administration of the water right. This express statement is necessary to comply with the requirements of Idaho Code section 42-1412(6). This *Order* in combination with the *Partial Decree* that was issued for this water right on January 15, 1998, sets forth all of the elements of your water right. The Snake River Basin Adjudication (SRBA) Court suggests that you keep this document in a safe location together with a copy of the *Partial Decree* to show evidence of the water right. The original of this *Order* and the original of the *Partial Decree* for this water right are on file with SRBA Court. If you do not have a copy of the original *Partial Decree*, one can be obtained by contacting the SRBA Court at (208) 736-3011. Please note that the *Order* is entered *Nunc Pro Tunc*, meaning that the *Order* will be treated as if it were issued the same date that the *Partial Decree* was originally issued.

Sincerely,

Water Right 36-02432B

Case No. 39576)

ORDER AMENDING IRRIGATION PERIOD OF USE ELEMENT
IN PARTIAL DECREE AND INCORPORATING INTO PARTIAL
DECREE AN EXPRESS STATEMENT REGARDING GENERAL
PROVISIONS, *NUNC PRO TUNC*

A *Partial Decree* was entered for the above-captioned irrigation water right on January 15, 1998. The period of use element was decreed as "irrigation season." In *A&B Irrigation Dist. v. Idaho Conservation League*, 131 Idaho 411, 423, 958 P.2d 568, 580 (1998), the Idaho Supreme Court remanded with the directive to include specific dates for the period of use element. Following remand, IDWR filed a *Supplemental Director's Report, Reporting Area 3, IDWR Basin 36, Regarding Revision of Period of use (For Irrigation Water Uses) and Conjunctive Management General Provisions*, which included an irrigation period of use recommendation for this water right. No objections were filed to this recommendation and the time period for filing objections has now expired.

THEREFORE, IT IS ORDERED that the period of use for the irrigation element of the above-captioned water right is hereby amended and decreed as:

PERIOD OF USE: 03-15 11-15

IT IS FURTHER ORDERED that the *Partial Decree* for the above-captioned water right is hereby amended and decreed to contain the following:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the court at a point in time no later than the entry of a final unified decree. I.C. section 42-1412(6).

This order is being entered *nunc pro tunc* as of the date the *Partial Decree* was issued and is not intended to modify any subsequent administrative changes for the water right, if any, which occurred following entry of the *Partial Decree*.

RULE 54(b) CERTIFICATE

With respect to the issues determined by the above judgment or order, it is hereby CERTIFIED, in accordance with Rule 54(b), I.R.C.P., that the court has determined that there is no just reason for delay of the entry of a final judgment and that the court has and does hereby direct that the above judgment or order shall be a final judgment upon which execution may issue and an appeal may be taken as provided by the Idaho Appellate Rules.

E. NARRATIVE/REMARKS/COMMENTS

The water for this permit comes from two wells. The first well (well 465) is located in the NW 1/4 - NW 1/4 - NW 1/4 of section 6, township 07S, range 20E. The second well (well 520) is located in the SE 1/4 - SW 1/4 - NE 1/4 of section 1, township 07s, range 20E. The water from well 465 is diverted directly into a mainline that travels north and south. The north end of the mainline travels north approximately 1/8 of a mile then elbows to the west for another 1/8 of a mile then elbows again and travels north to the northern end of the farm in section 35. The southern end of the mainline travels south to the southern

boundary of the farm in section 6. Approximately 1/4 of a mile from the well on the southern mainline there is a T intersection that connects the southern mainline and well 465 to well 520.

The water from well 520 is diverted into two mainlines. The first mainline is a north and south mainline. The northern section of this mainline travels north approximately 1/16 of a mile and elbows to the east to connect to the southern mainline from well 465 described above. The southern portion of this mainline travels due south for approximately 1/4 of a mile then continues on southwest for another 1/4 of mile following the contour of the farm. The second mainline from well 520 travels west approximately 1/4 of a mile then turns north to the northern boundary of the farm in section 1.

All of the lands in this farm are irrigated with handlines. This allows them to contour the hand lines to fit the shape of the farm. There is also a great deal of portable mainline used to irrigate the corners of the farm.

Have conditions of permit approval been met? ☒ yes ☐ no

RECOMMENDATIONS:

I recommend that this permit be licensed under the following conditions.

1. That when this right is combined with all other rights does not exceed the .02 cfs per acre limit for irrigation.
2. That this permit be for 1.25 cfs or .014 cfs/acre. The .014 cfs is the amount of water being applied to the rest of the 433 acres in permits 36-15121 and 36-02432B.
3. That when combined with adjudication claim 36-15121 and 36-02432B these wells do not exceed a total diversion rate of 7.33 cfs the capacity of the wells. Adjudication claim 36-15121 and 36-02432B is for a combined diversion rate of 6.79 cfs. This leaves only .54 cfs to complete well capacity. I have granted 1.25 cfs for this permit to allow Mr. Bingham to irrigate the 89.4 acres that is not covered under 36-15121 and 36-02432B allowing him to irrigate all of his ground all year by pulling water off of one crop to irrigate the other fields.
4. That this permit is for 89.4 acres Mr. Bingham has added these acres to the original 433 acre farm by using portable mainline to irrigate lands he could not reach with his original mainlines that was observed in the adjudication field exam of this property. Mr. Binbham will have to use both wells to irrigate these acres because these acres are spread out over to large of area to be covered by just one of his two wells.
