RE: Water Right Permit No. 13-7506

Dear Mr. Coombs and Mr. Tippetts:

The Idaho Department of Water Resources is currently reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that was established in compliance with the terms of the permit.

During the field exam, I found that the location of the spring and the location of the single-family home are slightly different than what was described on the original permit issued to James Read. The point of diversion (location of the spring) is actually in the SESWSW of Section 31, T14S, R40E. The permit described the spring in the NWNW of Section 6, T15S, R40E. Please refer to the enclosed maps. The place of use listed on the permit did not include the location of the single-family home in the SWNE of Section 36, T14S, R39E. Before a final water right license can be issued, your permit must be amended to depict your water use as it was actually developed.

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$100.00 filing fee. If I don't receive a response within 30 days, I will assume that you are no longer interested in the water right and will begin the process of voiding the permit. Feel free to contact me with any questions.

Sincerely,

RE: Water Right Permit No. 13-7506

Dear Mr. Coombs and Mr. Tippetts:

Thank you for taking time to meet with me last week. The Idaho Department of Water Resources is currently reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that was established in compliance with the terms of the permit.

When I got back to the office and reviewed my GPS readings, I found that the location of the spring and the location of the single-family home are slightly different than what was described on the original permit issued to James Read. The point of diversion (location of the spring) is actually in the SESWSW of Section 31, T14S, R40E. The permit described the spring in the NWNW of Section 6, T15S, R40E. Please refer to the enclosed maps. The place of use listed on the permit did not include the location of the single-family home in the SWNE of Section 36, T14S, R39E. Before a final water right license can be issued, your permit must be amended to depict your water use as it was actually developed.

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. I have also included a copy of the field exam for your reference. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$100.00 filing fee within 14 days. If you have any questions, please feel free to contact me at (208) 525-7161.

Sincerely,

A handwritten signature in black ink, appearing to read 'J. Cefalo', is written over a horizontal line.
