RE: Licensing Review Memo

Timeline:

Application Received: 6/10/92

Permit Issued: 2/3/95

Proof of Beneficial Use: 1/25/96

Field Examination: 9/4/97

Point of Diversion: The point of diversion is located at the headworks on Knapp Creek where the water is diverted for a large irrigation ditch (7.45 cfs) which is authorized under 77-4207. The PD that is described on 77-7207 is located in the NWNE of Sec. 18. However, after reviewing the system, the PD is actually located in the SWSE of Sec. 7.

POU: The place of use consists of a fish screen that is located near a point where Knapp Ck Rd intersects in a T with another road as depicted on the map. A ditch runs along the road that carries any fish that may have been diverted from the fish screen and discharges back to Knapp Ck.

Volume and Diversion Rate: The field examiner confirmed the diversion rate and the volume is based on the season of use of 77-4207. Water is not diverted in the ditch until 4/15 and diverts until 10/15 at the most.

$0.8 \text{ cfs} \times 1.9835 \times 184 \text{ days} = 292 \text{ afa}$

Amendment?: Yes. The PD and POU need to be amended to reflect the true legal description where they were developed.
