RE: Water Right Permit No. 75-14000

Dear Water Right Permit holder:

I appreciated the opportunity to speak with you regarding the licensing of your water right permit. I am sending you additional information that may help you understand Idaho's water right process better. Enclosed you will find:

- A copy of your application and permit file
- A brochure explaining the water right process in Idaho
- Copies of the statutes describing water right licensing

The purpose of the amendment, as we discussed, is to correct the legal description of your place of use and point of diversion to match the use you actually established. This step is important because the Idaho Department of Water Resources (IDWR) cannot issue a license for water use at a different location than was permitted. Changing the permit clears the way for protecting your water right by issuing an accurate license.

I am also enclosing an updated Application for Amendment. This includes the annual volume and removes a condition regarding the location of your point of diversion. These updates are based on information you provided in your conversations with IDWR staff yesterday. Please review the information and compare to your records. If it is right, please sign this updated form and return to the department along with the fee in the enclosed prepaid envelope.

If we haven't received the amendment by May 1, 2013, IDWR will assume you have no further interest in establishing a water right and your permit will be voided.

I apologize again that this process was not made clear to you in 2001. I assure you we are doing our utmost for you at this time. If you have any additional questions, please call me at (208) 287-4942.

Sincerely,

Shelley W Keen
Water Right Section Manager
