RE: PERMIT NO. 15-7291

To whom it may concern, (Mrs. Darla Block)

I am writing this letter for the extension of the water rights for the above permit. Since the application for the above water rights were received to me, the land has been leveled, fences have been replaced and strengthen, two wells for water have been drilled. The first a irrigation well at 500 feet, and the second for a domestic well at 650 feet.

When the irrigation well was being drilled the estimate of depth was about 525 feet, water was accessed at the depth over 320 feet. Due to the depth of the well, the advice from Mr. Mike Franson of Mountain West drilling was to change the diameter of the pipe, 16 inch pipe to 18 in a pipe because the pipe was froze and drilling could not continue with the 16 inch pipe. Due to this change the cost of the well sky rocketed to over \$50,000 in expense. The cost of increasing the pipe took from the budget I had for the pump and irrigation system.

I have evaluated the cost of a diesel pump versus electrical pump. With the cost of fuel prices of going who knows where and the options and abilities that electricity offers (i.e. use for a home and pump) electrical has been the choice we have made.

The plan has been for the neighbors and I to piggy-back each other and share the cost that it would take for Rocky Mountain Power to put in a three phase line to our wells and others homes. Due to the change that people had to make in their own lives in order to make their situations work, the total

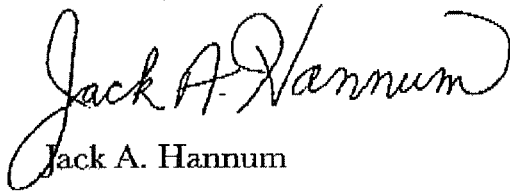

cost would incur to me of \$250,000 in order to get power to my pump. Monies have been saved and secure in order to facilitate the movement forward of my project!

Over the last few years Monies have had to be moved around to facilitate emergency open heart surgery (5 bypass) treatment for myself . Along with treatment for my wife after having been diagnosed without STAGE 4 cancer And has been receiving treatment and surgeries for over 3 years. She is doing well!!

The plan for the future is first to secure the extension, second to get the power to the pump and then to plant hay first and then grain in an alternating cycle. If at all possible I would request an extension until the year October 2017.

I appreciate your time in reading this letter for the application of the for said water permit.

Sincerely Yours,

A handwritten signature in black ink that reads "Jack A. Hannum". The signature is written in a cursive, flowing style with a large initial 'J' and 'H'.

Jack A. Hannum
