RE: Water Right Permit Nos. 63-12565 and 63-12566

Dear Permit Holders:

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the points of diversion and places of use were developed differently than described on your permits. The enclosed Applications for Amendment forms depict the elements of the water rights as they will appear on the licenses when issued. Please review the amendment forms carefully. If you concur with the information presented, please sign the forms and return them, with a \$100.00 filing fee each, within 14 days.

Kelly Christensen, the field examiner who conducted your exams, stated that he had relayed to you that you must provide documentation for the required 5 acre feet of mitigation water for 2012. The 5 acre feet will cover both permits. A copy of the contract with Water District 63 will be sufficient. Once the licensing of these permits is complete, the required mitigation will be based upon the licensed volume which is less than currently permitted. If you have any questions, please call either Kelly, or me, at (208)334-2190.

Sincerely,

A handwritten signature in black ink that reads "Kay Walker". The signature is written in a cursive, flowing style with a large loop at the end of the last name.

KAY WALKER
Sr. Water Resource Agent
