RE: Permit No. 85-15640

Dear Mr. and Mrs. Haas:

Thank you very much for meeting with me a couple of months ago so I could complete the field examination for your water right permit.

The next step in the water appropriation process is to issue a license based on my findings.

During my visit, I noticed that in addition to irrigating lawn and using water for your domestic needs within your home; you are also heating your home with water from the well.

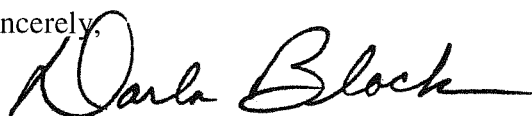

Heating purposes may be included under the domestic component of your permit, but I must get additional information from you regarding your heating system.

Please submit specifications for your heating system. Specifically, I will need to know the water requirements of the system; make, model, and serial number of the heating unit; where the unit was manufactured; and any other information regarding the system's water demands.

Please submit the requested information within 60 days. If the information is not submitted within 60 days, I will proceed with licensing your water right permit without accounting for the extra water used for heating purposes and you will most likely have to file a new application for permit to cover the additional water use.

Thank you for your time and I look forward to bringing your permit to a final resolution. If you have any questions regarding this matter please contact me at (208) 287-4944.

Sincerely,

For Cherie Palmer, Sr. Water Resource Agent
Water Allocation Bureau
