

Dear Steve Lester,

Please find inclosed the E-Mail from
Troy G. Smith which addresses the
water quality issue that has been
resolved for 65-23054 at #2 Snow
Spring Drive in Garden Valley.

Thank you in advance for working
to complete the licensing process for
my Garden Valley home.

Mae Webb

Requested Correspondence for IDWR Permit No. 65-23504 (Webb)
Troy.Smith to you [show details](#) 6 hrs ago
Mr. Webb,
Based on information in the Idaho Department of Water Resources (IDWR) 8/1/2012 field exam, notes, maps, and my personal communication with you, it is my understanding that the described activities for IDWR Permit No. 65-23504 (Webb) entail: 1) the diversion, ongoing since at least 1993, of 0.05 cfs from 2 hot springs for domestic and heating use, and 2) the subsequent discharge of the excess non-grey/non-black water (approximately 0.02 cfs) into an unnamed tributary of Warm Springs Creek. After reviewing Department of Environmental Quality's Final 2010 305(b) Integrated Report, associated data, Idaho Water Quality Standards, and because the described activities appear to be a delayed routing of the hot springs' discharge into the unnamed tributary of Warm Springs Creek, water quality in this tributary is not expected to change. Please note, however, that this correspondence does not excuse or waive your obligation to comply with all other applicable laws and regulations, including without limitation, the Clean Water Act requirement to obtain a discharge permit.

If you have any questions or would like to discuss this correspondence, please contact me at your convenience.

Troy G. Smith
Watershed Coordinator

Please note I.D.E.Q FINDING.
Water quality in the tributary is
acceptable as it is.

Thank you
Mac Webb
