RE: Water Right Permit No. 63-12608

Dear Permit Holder:

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the point of diversion and place of use were developed differently than described on your permit:

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$100.00 filing fee within 14 days.

Please be advised that we have found Right 63-12350 is also diverted from the well listed under this proposed license. Rt. 63-12350 was licensed with errors in the point of diversion and place of use locations and should be corrected with an application for transfer of water right. Since each of your water rights are diverted from the same well we have conditioned this right to reflect an overlap with Rt. 63-12350 even though it is described as being from a different location.

If you have any questions, please call me at (208)334-2190.

Sincerely,

KAY WALKER
Sr. Water Resource Agent
