RE: Water Right Permit No. 11-7552

Dear Mr. Jones:

Thank you for your phone call about the recent field exam and the proposed amendment. Your description of the system was very helpful. It is important that the water right license match the water system that was actually developed. I have enclosed a revised Application for Amendment. Before a license can be issued, the permit must be amended. The place of use has been expanded to include the trailer sitting in the NWSW of Section 24. I have also adjusted the field exam report and the water right conditions to note that the domestic use covers use at the trailer.

Please review the revised amendment and revised field exam report. If you concur with the information presented, please sign the form and return it to me with the \$100.00 filing fee within 14 days. If you have any additional questions, please feel free to contact me at (208) 525-7161.

Sincerely,

James Cefalo
Water Resources Program Manager

RE: Water Right Permit No. 11-7552

Dear Mr. Jones:

On October 29, 2012, I conducted a field exam of the development occurring under Permit 11-7552. The Department of Water Resources is now conducting a final review of the permit prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that was established in compliance with the terms of the permit.

When I got back to the office and reviewed my GPS readings and aerial photos, I found that the location of the place of use (campsite / RV site) is different than what was described on the permit. The permit describes the place of use in the SESE of Section 23. The actual place of use for the water right is in the SWSW of Section 24, T12S, R42E. Please refer to the enclosed map. Before a final water right license can be issued, your permit must be amended to depict your water use as it was actually developed.

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. I have also included a copy of the field exam report for your reference. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it to me with the \$100.00 filing fee within 14 days. If you have any questions, please feel free to contact me at (208) 525-7161.

Sincerely,

James Cefalo
Water Resources Program Manager
