Good morning Rex-

The subdivision is between Horseshoe Bend and Placerville, about 10 miles southwest of Placerville and about 15 west of Idaho City. I drove there Hwy 55 N, then east on Harris Creek Road. Please let me know if you would like me to email additional map with a more regional or other view.

Thank you – Vicky M

Vicky,

Can you give more detail about where this is located? I do not have any STR maps that show T7N, R4E, S28. Otherwise, inserting the language into item #5 that you suggest would be fine.

Rex R. Barrie
Boise River Watermaster

Hi Rex –

IDWR is in the process of licensing this permit for a fire protection pond in Star Ranch. The source is an unnamed stream tributary to Canyon Creek. Attached is the permit and 2 photos; an aerial with the pond and other features noted, and a photo of the pond and the retaining rock structure. There is no stockwater use so use will not be licensed.

Part of the retaining rocks on the downstream end of the pond are removed each year to allow water to flow through. A measuring device is required per the permit conditions but was not installed and it seems like overkill to require one. So, I am asking for your suggestions. Do you think it is sufficient in this upper basin area to reword condition 5, measuring device, with a condition that states the following:

Upon specific notification of the Department, the right holder shall ... [rest of condition 5 the same language], and shall install control works that allow the Watermaster to release water from the reservoir.

Do you have other suggestions for conditions?

Thank you.

Vicky Music
