CONDITIONS OF APPROVAL

1. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 67A.
2. No water shall be diverted to the reservoir from the unnamed stream located south of the impoundment.
3. All excess water in the reservoir shall discharge over the spillway, into the channel below the dam, and shall flow directly into the unnamed stream located south and west of the dam.
4. The spillway outlet to the pond shall remain in its present location at the most northerly portion of the dam.
5. Water stored under this right is subject to fluctuations of the water table caused by changes in the flow of local streams and by diversions under prior ground water rights. This right does not guarantee the maintenance of any particular ground water level.

State of Idaho
Department of Water Resources
Water Right License

WATER RIGHT NO. 67-14383

6. When ordered by the Director, the right holder shall provide mitigation acceptable to the Director to offset depletion of lower Snake River flows needed for migrating anadromous fish. The amount of water required for mitigation, which is to be released into the Snake River or a tributary for this purpose, will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this right. Any order of the Director issued in accordance with this paragraph shall be in conformance with applicable rules allowing the right holder due process as the need for mitigation and the amount of mitigation are determined.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. The water right confirmed by this license is subject to all prior water rights and shall be used in accordance with Idaho law and applicable rules of the Department of Water Resources.

Signed this 15th day of November, 2012.

JOHN WESTRA
Western Regional Manager
