

Water is pumped from the river in two locations -

1) ONE near #20

2) second across from it

RECEIVED

NOV 06 2012

DEPARTMENT OF
WATER RESOURCES

The water from these locations was used to pour footing/foundations on ^{each} side of the river.

The water from water pump near the #20 is used to pump water to my young orchard which is in a "swale". The water is also pumped into a holding tank which may or may not be visible from the road.

At present, temporary housing
(tent / tepee) are up part of the year
and dismantled the rest of the year.
Water is pumped for household use
into various containers.

Sincerely,

V. J. Harbour
