RE: Water Appropriation Permit 74-15613

Dear Mr. and Ms. Whittaker,

It is my understanding that after receiving the October 15, 2012, letter sent by the Department, you contacted Nick Miller, Watermaster of Water District 170. In your conversation, you told Mr. Miller that you could not have the measuring device with data logger installed by November 16, 2012, due to the ground already being frozen. The Department will not require that the measuring device with data logger be installed, but will still require evidence of the purchased data logger along with a diagram or schematic of the proposed diverting works. The deadline to submit this information will be extended 14 days to **November 30, 2012**.

In addition, it is your responsibility to notify the Department next spring, **prior to diverting water**, when the measuring device with data logger is installed so the Department may conduct a field examination. Diversion of water before the measuring device with data logger is installed will most likely result in the permit being voided.

If you have any questions, please call me at (208) 287-4916.

Respectfully submitted,

Craig L. Saxton
Water Rights Supervisor

Cc: Nick Miller, IDWR
