Subject: Permit 75-7638 - BLM

Hey James,

Short Story:

Is anyone working on permit 75-7590 (or anything) for Williams Lake Recreational Water & Sewer District? If not, do you care if we will try to resolve it here at the S.O.?

Long Story:

Rob Whitney recently conducted a field examination for BLM permit 75-7638. The BLM established their use under permit 75-7638 by tapping into a delivery system developed for permits 75-7589 and 75-7590 in the name of Williams Lake Recreational Water & Sewer District (*BLM traded a right to trespass in exchange for being allowed to tap into the system*).

There was a fight about amending 75-7589 and 75-7590 to municipal use. Much was said.

On September 10, 2007, Allen Merritt issued a preliminary order granting the amendment of permit 75-7589. In the preliminary order, Conclusion of Law #11 essentially said that the permitted use for 75-7590 is already covered under 75-7589. 75-7589 was licensed 5/2/2008

75-7590 remains a permit.

When Rob issues the BLM license on 75-7638, the license will have to address the shared POD's with 75-7589. I think we should clean up the one remaining loose end which is the need to seek relinquishment of 75-7590 or void it. However, 75-7590 is not on the S.O. "to do" list. Would you like us to bring 75-7590 to resolution?

Thanks,
c
