RE: Water Right Transfer – Application ID 73293

Dear Sirs:

In an effort to proceed with the processing of this water right transfer, I am providing additional information which should be helpful to complete this task.

The Keller property has a surface water right through the Peoples Canal Company that was used early on when the land was first broken out of sagebrush and homesteaded. Historically this water was used to flood irrigate the land for many years. In the early 1950's, a well was drilled and a groundwater pump began operation which improved the irrigation methods and increased the efficiency of the farm. The well water right is #35-13448. After the well was operational, we used it 100% of the time in place of the Peoples Canal water. Since the time the well water was first used, the Peoples Canal water was also maintained by continued ownership of company shares. A portion of the Keller property will no longer be irrigated. It will be a gravel pit, hence the application of transfer.

Sincerely,

Keith Keller
