Subject: Application for (Water Right) permit # 37-08916

Six cfs is a lot of water to remove from the main channel of the Big Wood River without interfering with senior water rights. I request that, if approved, this permit contain the following conditions:

- 1) The standard water not to be diverted when flows are below established minimum stream flows condition.
- 2) The applicant must demonstrate that the requested flow is capable of being maintained.

Thank you for the opportunity to comment - Bill G.
