RE: GREENER WATER RIGHT AND WAIVER

I have field inspected the water right and wells at Barney Greener's, Lorraine's Day Care. The well provides potable water to a day care facility. There are approximately 75 toddler age children at the facility. There is also less than 2,000 sq. ft. of grass irrigated by the well.

In addition, the well provides water to a flow through exchanger for heat and cooling of the facility. There is also an injection well on the property. The water used for the heating and cooling is non-consumptive.

The total amount of water used is de-minimus and should be waived the flow meter requirement.

Please call if you have any questions.
