Subject: Guinn water license measuring device
Attachments: Guinn 65-23525.pdf; Guinn 65-23526.pdf

Ron,
As we discussed by telephone, we have two permits for Lattie Guinn which have a condition requiring a measuring device on the diversions. (65-23525 and 65-23526). Both divert water from the waste water ditch flowing over her land which then flows back into the Payette River. These are located at T6N, R2W, Sec 4 or 4909 W. Idaho Blvd in Emmett.

65-23525 is for irrigation of 3.3 acres and stockwater located along the east side of the dirt road to her home.

65-23526 is for irrigation of 5.3 acres and stockwater around her horse riding corrals just below her home.

I've included the aerial photos, system diagrams and photos from my field exam to help explain the locations. When the permits were issues, the condition to install a locking and measuring device were included in the permit. For small acreages, this condition is no longer required but we needed your approval to remove the condition before issuing the licenses.

Thank you,
Glen Gardiner
