IDWR State Office
PO Box 83720
Boise, ID 83720-0098Subject: Beneficial Use Field Exam Report (63-31362)
Permit Withdrawal (63-32607)

Dear Pam,

Enclosed on behalf of Centers Construction, Inc. are a *Beneficial Use Field Exam Report* for permit 63-31362 and a Withdrawal for permit 63-32607.

Since SPF Water Engineering was hired to conduct the licensing exam, the filing fee submitted with Proof of Beneficial Use is not required for this permit. Please refund \$100 to Centers Construction, Inc., receipt No. C071049.

Please note that permit 63-31362 lists one point of diversion, however two wells were developed as described on the Proof of Beneficial Use submitted September 29, 2003. To correct the oversight, an Application for Amendment of Permit was submitted December 12, 2006 for the additional well. The associated well logs indicate that both wells were developed prior to proof submittal. Rather than processing the amendment application, Western Region planned to use a licensing amendment as the vehicle for adding the second well to the water right. With this understanding, please substitute the Application for Amendment of Permit filed December 12, 2006 for the licensing amendment necessary to add an additional point of diversion to water right 63-31362.

Also enclosed is a Withdrawal of Application for Permit 63-32607 that you inquired about in our telephone conversation. This application proposes diversion from the same two wells that serve permit 63-31362. As we discussed, the plans for the proposed development have been suspended.

Please let me know if there are any questions. Thanks Pam.

Sincerely,

Lori Graves
Water Rights Specialist
