Subject: Re: Forms Received for Water Right Permit No. 85-15683

Darla,

I knew I should have called before submitting the forms. Keith Franklin was so helpful during the original process; having a full knowledge of a topic sure helps. I would very much appreciate your changing the extension to 3 more years. We have a lot to do still and I didn't realize it could be worked on over that time period. The pond and yard work is done and some of the field equipment ready but the work in and around the pump house to transfer the water to the different final destinations will take some thought and work as well as expense. I guess you can disregard the proof document and make the appropriate length of work changes to the extension giving us the extra time to the allowed maximum. We may need it.

Darla, again I am in debt to the thoughtful people in our state department of water resources and to you in particular. Thank you so much.

Re: Water Right Permit No. 85-15683

<<Permit 85-15683.pdf>>

Dear Permit Holder:

On October 25, 2012, the Department received a Statement of Completion for proof of beneficial use ("proof"), and a Request for Extension of Time ("extension request") from you for the above referenced permit to appropriate water. The Department is also in receipt of a \$150.00 filing fee. **However, the Department can only accept one of the two forms you have filed.**

If you have not completed the project and put the water to its full beneficial use, it is only the Request for Extension of Time form that need be filed. I noticed that you are only asking for a 1 year extension in order to complete the development and put the water to use, which includes irrigation of 150 acres. You could ask for 3 more years to complete the development which would take you to the end of the initial 5 year development period allowed. Unfortunately I am unable to make any changes on the form you submitted, unless you were

to reply to this email requesting that I make a change on the form for you. But, please be specific as to what you want changed.

If you have completed your project and the water has been put to the full beneficial uses listed on this permit, it is only the Statement of Completion ("proof") form that need be filed. Your permit allows for irrigation use of 150 acres. You listed the number of acres being irrigated as 5.3, if this is correct you would be limited to the 5.3 acres of irrigation as listed on you proof form.

To provide you with information regarding the permitted water uses and rate of diversion attached is a copy of the permit for your reference. Please respond with verification as to whether it was the completed extension request form, or the completed proof form that you meant to file for the above mentioned permit. I will hold this matter for **(15) days** from the date of this email for a response.

Please contact me at (208) 287-4945, if you have any questions.

Sincerely,

Darla Block
