Michele,

Thank you for the image. It does look as if it is representative of the PDF that I sent earlier. I am interested in one final phone conversation to ask you a couple final questions. I will find a way to facilitate that the beginning of the week.

Thank you.

Peter

Mr. Stearns,

I have successfully imported the files and projected them. I have attached a jpg screen shot of how the shape appears in a database layer. I believe that this is a true representation of your earlier PDF but it is not attached to the water right yet. I will make that connection only if you are comfortable with it.

Thank you. And please extend my thanks to your engineer. This work will save me a lot of time.

Michele,

Here are the shape files that were provided to me by our engineer. I do not have the programs required to open these files and provide them to you with some trepidation as a result. If these are used to transfer the "same" image that I provided you in the form of a pdf, and the result is the same, (as I would assume it would be) then there should be no concern. I would very much like to see the finished image before it is filed. I will be unavailable throughout next week but should have access to my e-mail. I look forward to hearing from you.

Thank you,
Sincerely,

Peter

Subject: Correction to the Field Examiners Report.
Attachments: Bald Mtn update map 9-6-12

Michele,

Thank you for your patients with my correction to the Field Examiners Report. I could see where his challenges came from as the 1964 USGS topographic map was difficult to read. I did not change anything where the correct graphic representation was made. I did reduce some areas where a broader than realistic placement was represented. There were two areas that were inaccurately represented. One was near the top of the Mountain and the other was the Seattle Ridge area (The bottom of the image).

Please call me when you receive this as I want to make sure we have a mutual understanding moving forward.

Again, Thank you for patience.

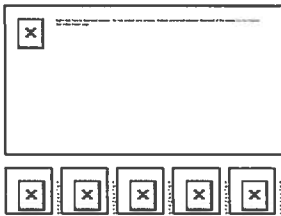

Sincerely,

Peter Stearns

Michele,

The tip of the Red arrow is the actual point of diversion for 37-08575. I am currently working on the Map for the accurate place of use.(the modifications to the errors that were discovered in the Field Examiners report). I will have that to you in the next couple of days.

<<37-8575A POD.jpg>>

Mr. Stearns,

I have attached a file showing recent aerial photography of the quarter-quarter where IDWR believes your well for snow making use is located.

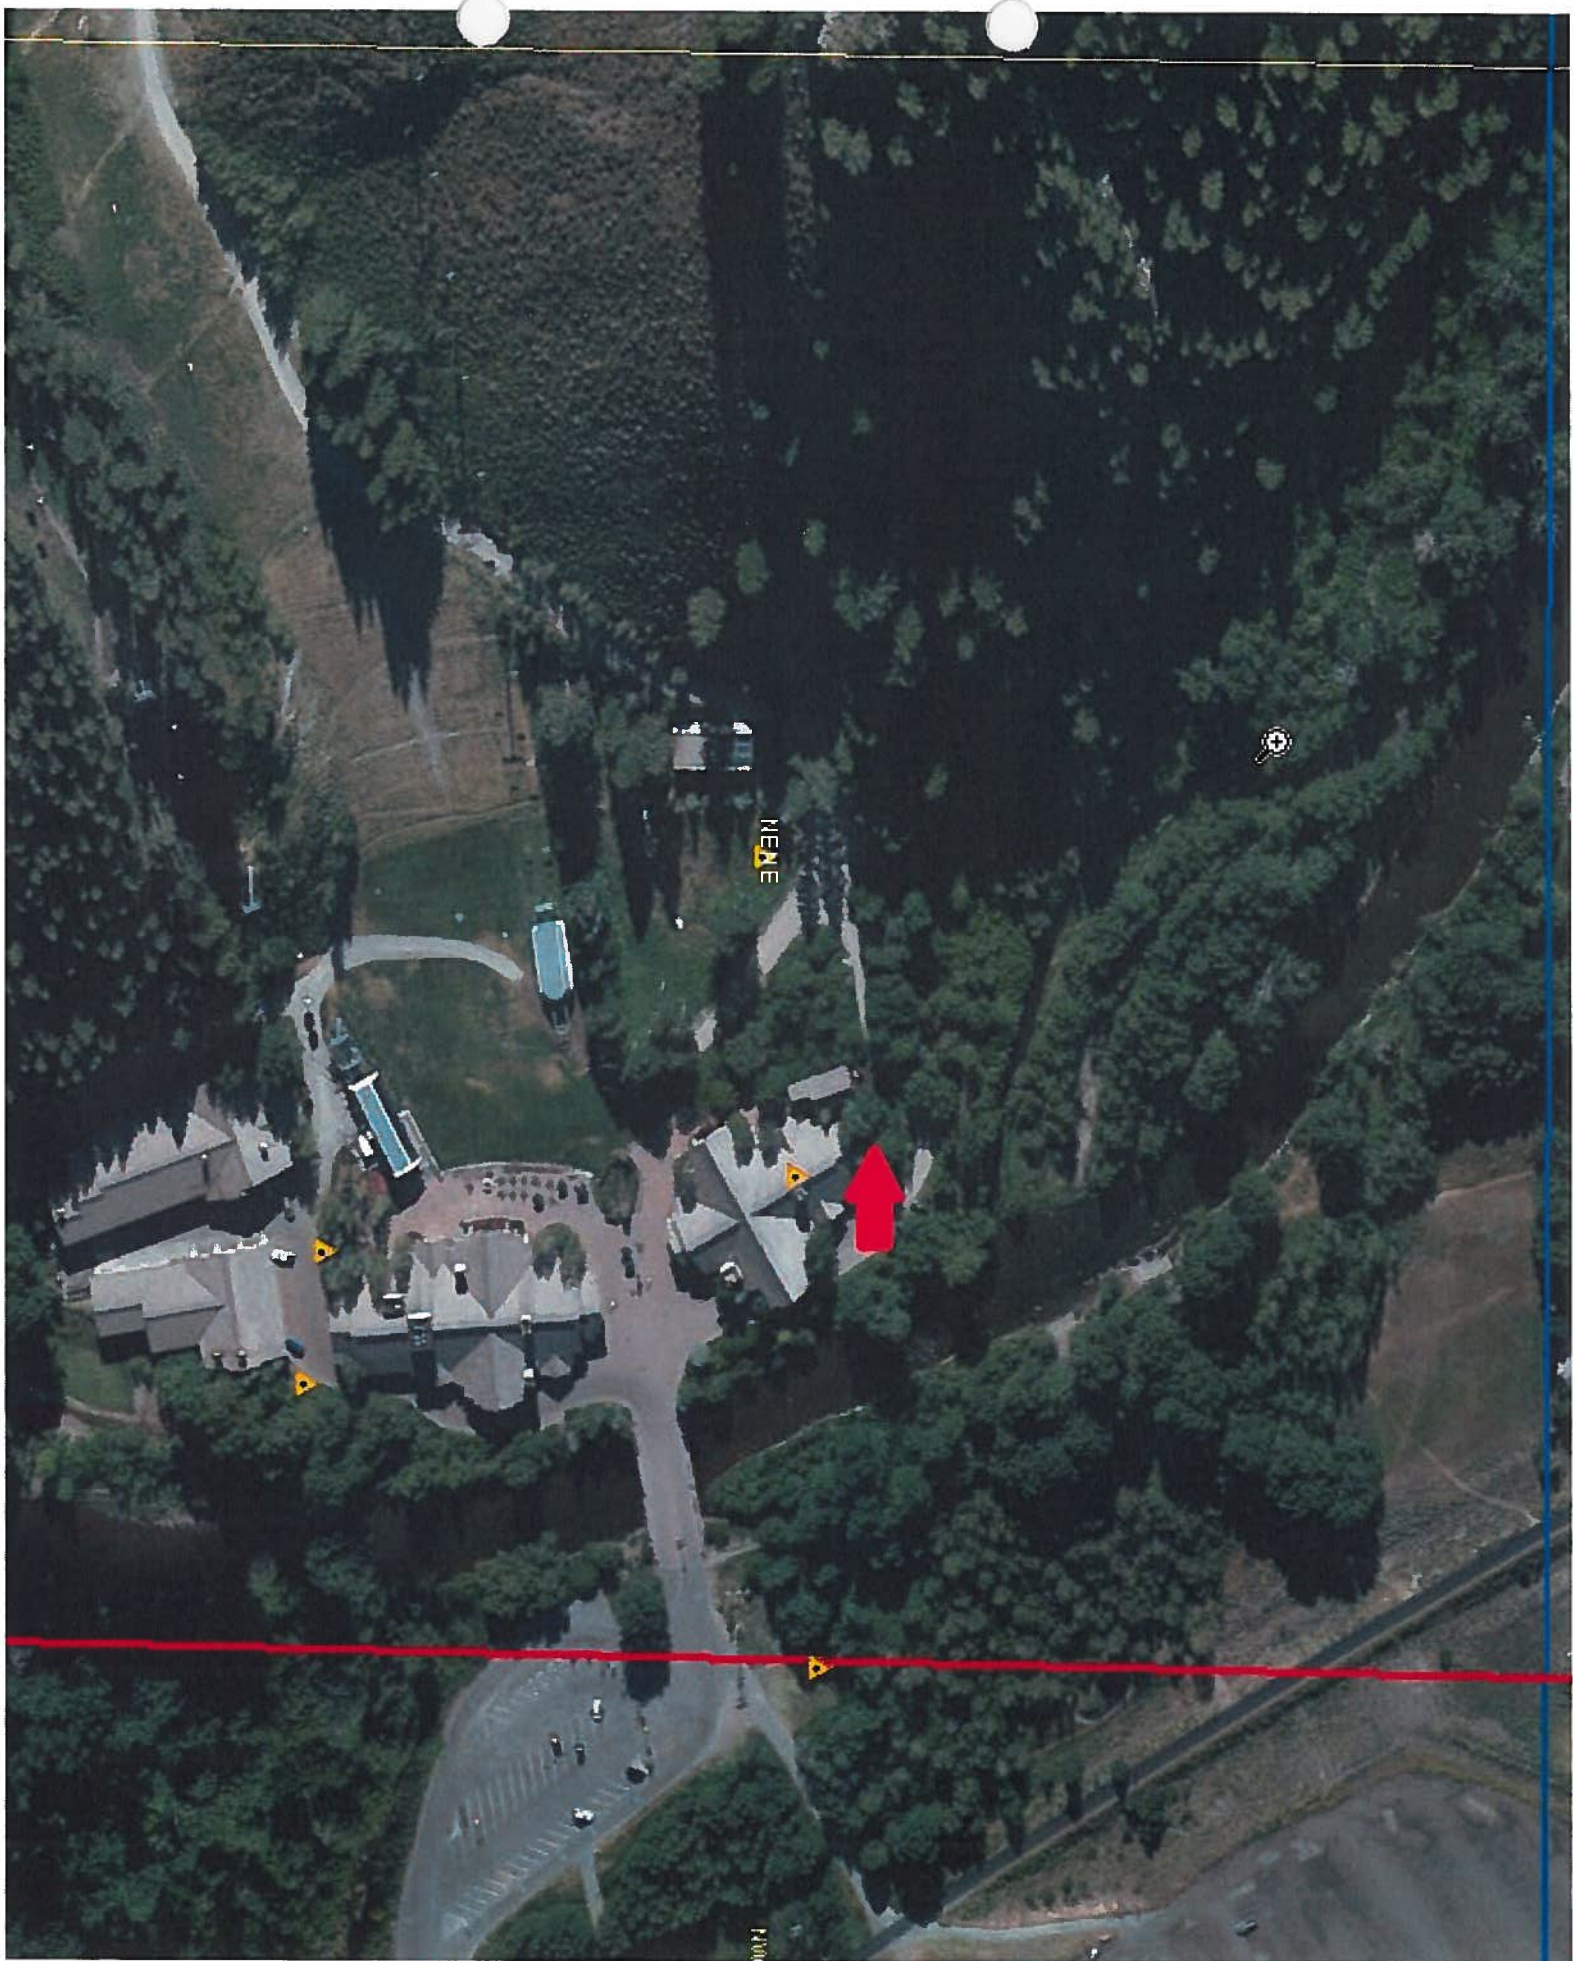

The orange triangle shapes represent locations of points of diversion. The orange triangle in the center, underneath the NENE label, is where the database shows this well is located.

Please indicate on this aerial photo the true location and sent it back to me.

Thank you.

Michele Edl
