DEPARTMENT OF
WATER RESOURCES

PERMIT NO. 67-15012

ATTN.
DAN NELSON

We are sorry about being late with this information. It was an honest mistake. It was put aside and forgot about. Please forgive us.

These photos show some of the trees that all water with bubblers and green areas for fire protection that use gear drive sprinklers.

The valves and timers are inside of the well house and shop away from the gophers and frost.

Some of the lines may need to be modified at times but nothing major.
This system was completed in August 2010.

Thank You

William Sorensen

Elizabeth Bramble
