

MEMORANDUM

Date: October 17, 2012
To: Water Right File 25-14114
From: csaxton
Re: 35-14326 and 35-14327

35-14044 and 35-14050 were renumbered to 25-14326 and 25-14327 respectively per approval of transfer 76778 in November 2010. The transferred rights do not include any combined use limits with other existing Falls Water Co. rights.

Permit 25-14114 was issued in October of 2005 and did not include combined use limits with 35-14044 or 35-14050 (Parent rights) at the time it was issued. Since 25-14326 and 25-14327 were introduced to the Falls Water Co. suite of rights after approval of permit 25-14114, and at that time was not identified as requiring a combined use limit with the existing rights, it is not appropriate to limit 25-14326 and 25-14327 to 3730.4 AF when used in combination with other rights. Rights 25-14326 and 25-14327 are enlargement rights for irrigation use within the municipal service area. The volume associated with 25-14326 and 25-17327 is in addition to the 3730.4 af limit for the previously existing rights.
