

MEMORANDUM

Date: October 24, 2012
To: Transfer 78065
From: amerritt
Re: review and approval

This transfer was processed in the region. It was advertised and protested. Initially the application included water for another property that would share the same pump system but it was amended to remove the other lot. The amendment was not readvertised. The watermaster has reviewed the application and does not oppose approval. The protest was resolved with the inclusion of measuring device and control works requirement. The right will be limited to 0.03 cfs and 3.5 afa/acre when applied thru sprinklers. The applicant requests 5 years for completion. It is being approved out of the region as drafted.
