Attachments: H2O Temp and Elevation.xls

Craig,

I apologize, somehow these two emails were stuck in my outbox and I didn't realize it. I will call you tomorrow to discuss this further.

Thanks,

Rob

Ray and Rob,

This is the mail having a clarification of the data I sent to your offices on Sept. 8. This and the other data sent on the Sept. 7th showing monthly flows and weekly Temp. and elevation data should have been included in the mailing to the IDWR.

Please let me know if this was done which will help with answering Spackman.

Thanks,

G. Katsilometes

Hi Ray and Rob,

Here, in the attached, is an improved chart of weekly Temps and Elevation (Which Do Not Change).

George

Here is the second email.

Rob

From: George Katsilometes [<mailto:dsigeorge@hotmail.com>]
Sent: Thursday, September 27, 2012 6:57 AM
To: Robert H. Wood; Ray Rigby
Subject: FW: Well Measurement Info.

Hi Ray and Rob,

Please note this email which was sent to your offices on Sept. 7. This and the email I sent you about the refinement of the data should have been sent to the IDWR. The sheet tabs at the bottom of the first 2 attachments above give the reviewer flow data for each month from Jan. 2008 and the sheets at the bottom of the last attachment give the weekly water temp and elevation of the water in the well from Jan. 2008.

This data and the refinement to the data should have been sent.

Now, if they were sent, Spackman has no further legal requirement as stated in the Permit in question under sections 8 and 9.

If they were not, they must be sent with explanation.

Please get back to me as to the legal requirements and the demands of the IDWR.

Thanks,

G. Katsilometes

Ray and Rob,

Please find the documents for IDWR. The first 2 are volume measurements for 2008 through the present and the H2O Temp... attachment is the Temp and Elevation for each week in the same time period.

Please let me know what to do now.

George K.

From: Craig L. Saxton 

RE: Submitted Data

On October 4, 2012, I received two e-mails from Rob Wood, attorney for permit holder George W. Katsilometes. The e-mails contained 3 Excel files:

Pump measurement.xls
Well Measurement 2.xls
H2O Temp and Elevation.xls

I printed out copies of these files to be inserted into the water right file. However, for clarity sake, I added a header that listed the file name and the year of the data. And a footer that shows the path to the files and page numbers. This information was added to all the documents submitted. I DID NOT manipulate the data at all.

January February March April May June July August Sept. October November December
